2-24-04AGENDA FOR TELEPHONE INTERVIEW

Sir:

I would like to request a telephone interview on February 27, 2004. Please consider the following topics for discussion:

- *Rowley* teaches a cancel control for canceling a transmission from a server to a client. *Rowley* does not teach or suggest "generating a message, wherein the message presents the at least one information element," as recited in claim 21.
- *Rowley* teaches canceling an update; however, this update includes information to be transmitted to the Internet processor, rather than from the Internet processor, as in claim 21. The process in *Rowley* is actually the opposite process from that of the present invention.
- *Reha* provides the same basic teachings as *Rowley*, namely software updates to an Internet processor, rather than transmissions from an Internet processor. Thus, *Reha* does not provide for the deficiencies of *Rowley*.
- Representative claim 21 recites a method in an Internet processor. Therefore, each step within the claim is performed in the same Internet processor that information is being transmitted from. Therefore, the claim clearly distinguishes from a control for canceling transmission to an Internet processor, because the "message" is not being presented at the computer from which the update is being transferred.

The Examiner is invited to call at the below-listed telephone number to confirm or reschedule the requested telephone interview.
